Debossed Wristbands

Debossed wristbands are, by far, the most popular and most common style of custom wristbands available on the market today. Debossed wristbands come in a variety of colors which can be solid, segmented or swirled. We'll take your design and mold it directly into the wristband. Your design can include a logo, a slogan, the name of your company or organization, or a mixture of all three. We use 100% medical-grade, hypoallergenic silicone when manufacturing all of our wristbands. Choose debossed wristbands if you want great-looking wristbands at an affordable price!

Embossed Wristbands

Looking for something a little different from the standard debossed style wristband? Then choose embossed! With an embossed wristband, instead of engraving your design into the wristband, we raise your design above the surface of the band. That helps your design stand out even more! Embossed wristbands can be ordered in your choice of color(s), and colors can be solid, swirled or segmented around the band. We use only 100% medical-grade silicone for our wristbands. Embossed wristbands are a great choice for those looking for something unique!

Color Filled Wristbands

With color filled wristbands, we take the standard debossed wristbands and add an extra layer of color. We fill the recessed areas of your wristband design -- the words or logo -- with paint to provide a striking contrast to the wristband. The colored paint makes your design seem to pop off the wristband! Color filled wristbands provide a head-turning look that's visible from a distance. We offer a variety of colors to choose from for both the wristband AND the paint, so mix and match colors to find something that works best for you. Choose color filled wristbands when you want to add another layer of color to your design.

Color Coated Wristbands

Color coated wristbands are the newest style we carry. Before engraving your design into the wristbands, we coat the outside of the bands with paint in your choice of color. After painting, we engrave your design into the bands. The engraving causes the original color of the wristbands to show through the paint to provide a sharp contrast sure to turn heads. If you want your design to stand out from across the room, look no further than color coated wristbands!

One Inch Wristbands

One-inch wristbands are great for those who want to include a large design that really turns heads. The extra space allows more room for your design, so you can add more to your design or simply make it larger. Standard wristbands are ½-inch, so with a one-inch band, you have twice the space. One-inch wristbands can be debossed, color filled, or silk screened. The one-inch wristbands are increasingly popular with musicians and bands, so don't be surprised if you see them for sale at the next concert! Choose one-inch wristbands when your design simply won't fit on the standard ½ inch band.

Three Quarter Inch Wristbands

One-inch wristbands too big, but the standard ½-inch too small? Then the ¾-inch wristbands are just right! With the ¾-inch bands, you have more room for a larger design, while still not being too large. Three-quarter-inch wristbands featuring the name of a musician or band are becoming a common sight at concerts and music stores around the world. Three-quarter-inch wristbands can be debossed, color filled, or silk screened. A full-color silk screened or debossed painted ¾-inch wristband with a large design is sure to catch the eye of anyone who sees it, even at great distances!

Segmented Wristbands

Wristbands with segmented colors are perfect for almost any situation. Two (or three) colors are in segments around the band to provide an extra splash of color. Segmented colors are great for schools and sports teams with multiple team colors. Holding an appreciation day for a particular country? Design some wristbands with the colors of the country segmented around the band! Segmented colors can be on any type of wristband except color coated. So take your wristband design to the next level with some segmented colors, all while staying within your budget!

Swirled Wristbands

Swirled colors provide a tie-dyed look to your wristbands. We'll take two (or three) colors and swirl them together around the band for an extra colorful look. Swirled wristbands are perfect for fundraisers, schools, sports teams, and just about anything with multiple colors! Debossed, embossed, silk screened, and debossed painted wristbands can all have swirled colors. Swirled colors provide a blast of color to your wristbands, all at an affordable price. So if you're looking to add some color to your wristbands while still staying within your budget, choose swirled colors for a tie-dyed look!

Silkscreen Wristbands

Silk screened wristbands are the best option for designs incorporating an intricate logo or design. We print your design directly onto the wristband band using the silk screen process. We can include any type of design or logo, as long as it fits onto the wristband! The silk screen process allows us to print all the way around the band at no extra cost as well. Please be aware the silk screen print does not last as long as the color filled wristbands do. Silk screened bands provide an affordable alternative that includes specialized designs!

Keychain Bands

Instead of wearing the wristbands, why not turn them into keychains? Keychain bands take a regular wristband and add special hardware to make it a keychain. Looking for a unique way to advertise your car dealership or real estate agency? Make custom keychain bands featuring the name of your company to give to customers when you hand over the keys! Keychain bands include a standard sized wristband in your choice of color and style. The bands can be debossed, embossed, color filled, or silk screened and can also have swirled or segmented colors. Choose keychain bands when you're looking for something different than the standard wristband!

Micro Wristbands

Micro wristbands are becoming increasingly popular at schools and fundraising events. Because micro wristbands are only half the size of standard wristbands, many people choose to wear multiple micro wristbands at once. Due to their size, these wristbands are always the silk screened style. However, that means you can include a logo or other intricate design on the bands. Just be aware that the smaller size may make more intricate designs difficult to see. Order multiple colors for your wristbands and people are able mix and match the colors they like best. Remember, thin is in!

Finger Bands

One of the newest items we carry, finger bands, are a simple, easy way to advertise for your business or organization. Instead of wearing the bands around the wrist, finger bands are small enough to wear on fingers similar to a ring. We manufacture the finger bands using the same 100% medical-grade silicone we use for all of our wristbands. Finger bands are the debossed style, available in your choice of colors. We'll imprint your message directly into the band. Just remember, due to the small size of the bands, a large design might not fit. If you're looking for something different and unique, then finger bands are the perfect choice for you!
